

COMPLETE SYSTEM DESIGN

CUSTOM SOLUTIONS FOR ANY NEED

OFF-GRID

We analyze your electrical loads and design a solar and battery system to power your home year-round, completely independent of the power grid.

GRID-BACKUP

Whether you want to gain independence from the electric utility or provide backup power in an emergency, we'll explain your options and develop a tailored system to meet your needs.

COMMERCIAL

Iron Edison designs and builds custom battery solutions, no matter how big or small the need. Avoid costly utility demand charges by investing in a battery system for your business.

TELECOM

Upgrade out-dated and costly lead-acid batteries to state-of-the-art Lithium Iron, providing years of no-maintenance operation that can be monitored anywhere with an internet connection.

DESIGN INCLUDES:

SOLAR PANELS

With customized racking solution for roof or ground.

HARDWARE

Including inverters, charge controllers, combiner boxes and circuit breakers.

BATTERIES

The heart of your system, Iron Edison batteries are built to last for decades with unmatched reliability and performance.

OUR PROCESS:

- ✓ UNDERSTAND your need. We'll ask questions and gather information.
- ✓ EARN the right based on our extensive experience with battery-based solar systems.
- ✓ MAKE a recommendation that's tailored to meet your specific needs.
- ✓ SUPPORT for life of battery, including help with system programming.
